SUMMARY REPORT
FT 900

April 1969

FOR RELEASE
May 28, 1969

EXPORT AND IMPORT MERCHANDISE TRADE

The Bureau of the Census, Department of Commerce, announced today a seasonally adjusted April 1969 export total of $3,354.7 million, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, and a seasonally adjusted general import total for April of $3,177.2 million.[1] [2] [3] Comparable seasonally adjusted totals for March were $3,196.0 million for exports and $2,980.7 million for imports.[1] [2] [3]

The April seasonally adjusted export and import totals are at record high levels. This month's export total exceeds the previous high of $3,224.7 million (September 1968) by about $130 million. For imports, April is the second month in a row that a record high level was reached and is the first time that seasonally adjusted imports have exceeded $3.0 billion. The Bureau noted that although the seasonally adjusted (and unadjusted) export and import totals for April were at record levels, the figures probably reflect a continuation of "above-normal" vessel activity at East and Gulf Coast ports following the settlement of the dock strike which began on December 20, 1968 and ended at different ports on different dates between February 14 and April 2, 1969. The Bureau does not, however, have adequate information to enable it to measure precisely the influence of the strike on the statistics.[1] [2] [3]

For the first 4 months of 1969, exports on a seasonally adjusted basis were at an annual rate of $32,822 million (about 4 percent below the calendar year 1968 total of $34,087 million). Imports were at an annual rate of $32,494 million (about 2 percent below the calendar year 1968 total of $33,252 million). For the 4-month period, January-April 1969, seasonally adjusted exports averaged $2,735.2 million per month, a level about 7 percent less than the $2,953.1 million average reported for the preceding 4-month period September-December 1968. Imports averaged $2,707.8 million for the current 4-month period, a level about 6 percent below the $2,875.6 million average reported for the preceding 4-month period.

Seasonally adjusted export and import totals for selected Schedule A and B commodity sections and divisions are shown in tables 4 and 5. (Unlike the overall total, the commodity components for exports exclude foreign merchandise and include Department of Defense (DOD) Military Assistance Program Grant-Aid shipments.)

Exports, unadjusted for seasonal change and excluding Military Assistance Program Grant-Aid shipments, increased from $3,366.7 million in March to $3,506.9 million in April. With Military Assistance Program Grant-Aid shipments included, exports increased from $3,418.0 million in March to $3,565.9 million in April. Unadjusted general imports amounted to $3,334.3 million in April compared to $2,993.0 million in March.

[1] *Adjusted for seasonal and working-day variation, but not for price level.*

[2] *"Normal" working-day and seasonal adjustment factors used in adjusting export and import data are not strictly applicable to periods of abnormal port activity such as those before, during, and after strikes. This is particularly true of the "working-day" component of the adjustment process since the period is abnormal as to both overtime and number of "working" days. Users should take note of this limited applicability when making comparisons involving the seasonally adjusted data for December 1968-April 1969.*

[3] *Cumulations of data over at least 3- or 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. The average rise and decline figures exclude percentage changes for: (1) the periods December 1962-March 1963 and December 1964-May 1965 because of abnormalities in the data due to effects of strikes; and (2) periods when negligible changes (zero per-cent) in the level of exports/imports occurred.*

Series	Month-to-month				Average monthly rates of change			
	Mar.-Apr. 1969	Feb.-Mar. 1969	Jan.-Feb. 1969	Dec. 1968-Jan. 1969	Average rise 1963-1968	Average decline 1963-1968	4 months Dec. 1968-Apr. 1969	12 months Apr. 1968-Apr. 1969
Exports....	+5.0%	+39.2%	+9.7%	-29.7%	+3.8%	-3.1%	+6.1%	+2.7%
Imports....	+6.6%	+12.3%	+31.6%	-31.0%	+3.1%	-3.1%	+4.9%	+2.7%

EXPLANATION OF STATISTICS

Import Statistics

General imports are a combination of entries for immediate consumption and entries into bonded warehouses. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption.

The dollar value shown in the import statistics is defined generally as the market value in the foreign country and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended. None of the values have been adjusted for changes in price level.

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the month of import, which is based on the filing data of the import entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the actual month of importation to a subsequent month, usually the succeeding month. The carryover should have little effect on month-to-month comparisons of overall totals, since the carryover of the previous month should compensate roughly for that of the following month.

Export Statistics

Exports of domestic merchandise include commodities which are grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

The dollar value shown in the export statistics is defined generally as the f.a.s. value at the U.S. port of exportation. These values have not been adjusted for changes in price level.

In general, compiling procedures provide for the inclusion of shipments in the statistics for the month of export.[2] However, as indicated above for imports, because of processing problems there has always been a carryover of a small percentage of shipments from their actual month of shipment to a subsequent month, usually the following month. The statement above regarding the effect of the import carryover generally applies to exports also.

Revisions to the Statistics

Revisions are carried into the statistics on a periodic basis. Data for 1968 and 1969 appearing in the 1969 monthly issues of this report are presented as follows:

1969 Statistics

a. January through November 1969 issues: figures are as originally issued, except as noted below.

b. December 1969 issue: figures reflect revisions for prior months of the year issued with December 1969 statistics.

1968 Statistics

a. January through May 1969 issues: figures reflect revisions issued with December 1968 statistics or earlier.

b. June through December 1969 issues: figures reflect revisions to 1968 data issued with June 1969 statistics.

In addition to the revisions which are made on a periodic basis, instances may occur where a significant error in the statistics for a month of the current year is discovered after the statistics for that month are compiled. If the error is of sufficient importance to require correction prior to the time that the regular revisions are carried, the correction is made and so noted in this report.

Sources of Further Information About Foreign Trade Statistics

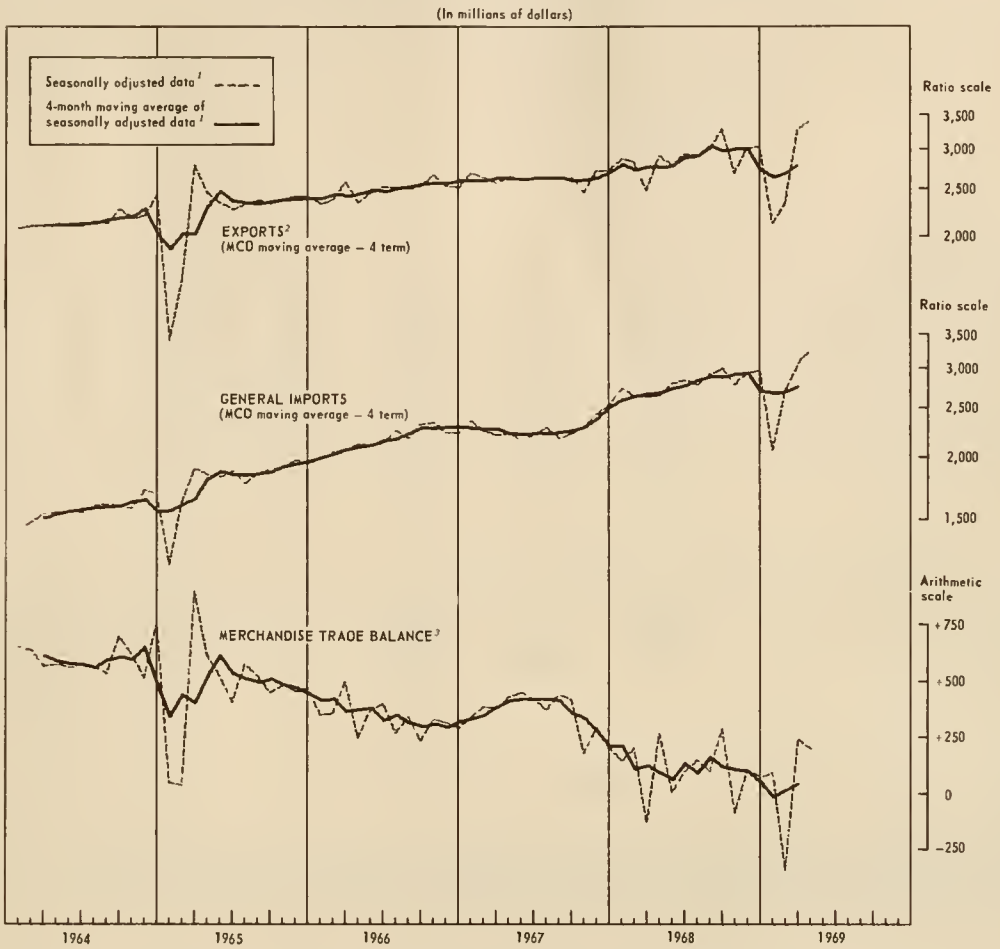
Additional information regarding coverage, valuation, etc., is contained in the following publications: Report FT 990, Highlights of U.S. Export and Import Trade; FT 135, U.S. Imports, General and Consumption, Schedule A Commodity and Country; FT 410, U.S. Exports, Schedule B Commodity and Country; and the Guide to Foreign Trade Statistics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Bureau of the Census, Washington, D.C. 20233.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

[2] With minor exceptions, the date of export for shipments other than by mail is the date when the shipment leaves the United States, or, in the case of vessel or air shipments, the date when the carrier departs (or is cleared) from the port of export. For mail shipments, the date of export is considered to be the date of mailing.

U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted For Seasonal and Working-Day Variation: January 1964 to April 1969



[1]Abnormal fluctuations in the data for December 1964-May 1965, March 1968, and December 1968-April 1969 are due to effects of dock strikes. [2]Represents exports of domestic and foreign merchandise excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments. [3]Defined as exports (see footnote 2, above) minus general imports.

[1]Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted totals also reflect new seasonal adjustment factors which became effective with the March 1969 statistics.

[2]Data differ from those released in Department of Defense reports because of a difference in statistical definitions. For a further explanation, see footnote 2, table E-1, Report FT 990, Highlights of U.S. Export and Import Trade.

Table 3. U.S. Imports of Merchandise, by Month: January 1968 to April 1969

(In millions of dollars. Includes data on silver ore, base bullion, and refined bullion. Unadjusted totals represent sum of unrounded figures hence may vary slightly from sum of rounded amounts)

Period	1968			1969

[1]Schedule B section and selected division descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related materials
4. Animal and vegetable oils and fats
5. Chemicals
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
   - 71. Machinery, other than electric
   - 72. Electrical machinery, apparatus, and appliances
   - 73. Transport equipment
8. Miscellaneous manufactured articles, n.e.c.
9. Commodities and transactions not classified according to kind

[2]Seasonally adjusted figures for section 7 may differ slightly from the sum of divisions 71, 72, and 73 since each is independently adjusted.

[3]Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. The adjusted data also reflect new seasonal factors which became effective with the March 1969 statistics. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 2 were developed independently.

[4]For technical reasons, data are not presented for this section.

Table S. U.S. General Imports--Schedule A Sections, Seasonally Adjusted and Unadjusted by Month: January 1968 to April 1969

(In millions of dollars. Data on silver ore, base bullion, and refined bullion are included in 1969 figures but excluded from 1968 figures. Unadjusted totals represent sum of unrounded figures hence may vary slightly from sum of rounded amounts)
